

DAVID BONILLA

BLOCKCHAIN DEVELOPER

Professional Summary

I am a blockchain developer with expertise in smart contracts (Solidity & Rust), Web3 technologies, and decentralized solutions. I hold certifications from MIT (Blockchain Disruptive Technology, 2021) and Dapp University (Blockchain Development Mastery, 2024).

Currently, I am a Blockchain Developer Intern at FlowerWork, where I contribute to integrating blockchain and AI for task automation and decentralized governance. I also collaborate with Medicure On, developing blockchain-based solutions for secure healthcare data management. My experience spans Ethereum, Solana, security optimization, and multi-chain infrastructure.

I am a Swiss resident with legal work authorization in Switzerland and the U.S., a fast learner, and always eager to adapt to new technologies. Letters of recommendation and certificates are available upon request.

EDUCATION

2022- 2024 DAPP
UNIVERSITY

Blockchain Mastery Program
Certified

2021 MIT BlockChain
Program

Blockchain Disruptive Technology
Program Certified

SKILLS

Blockchain Mechanics

Solidity

Rust

Smart Contracts

API & LLM Integration)

DEFI

Layer 1 & 2 Integration

LANGUAGES

English (Fluent)

Spanish (Fluent)

Portuguese (Intermediate)

German (Learning)

WORK EXPERIENCE

MediCureOn

Lead Blockchain Developer

2025 - PRESENT

Developed and deployed smart contracts for the project's ICO, ensuring a secure token distribution process and investor participation. Designed and implemented blockchain-based solutions for decentralized and secure healthcare data management. MediCure On is pioneering a proprietary blockchain for healthcare, integrating AI, IoMT, and decentralized technologies to create a seamless, patient-centered ecosystem that connects traditional and alternative healthcare providers.

Flower Work

Lead Rust Blockchain Developer

2024- PRESENT

Designed and deployed staking mechanisms, governance models, and smart contract security frameworks for the platform.

Developed and optimized smart contracts using Solidity and Rust, ensuring efficiency and security in DeFi and blockchain-based automation.

Led cross-chain integrations, enabling seamless interaction between Ethereum, Solana, and other blockchain ecosystems.

Implemented AI-driven automation, integrating Large Language Models (LLMs) to enhance blockchain workflows.

Conducted smart contract audits and security assessments, ensuring protection against vulnerabilities and optimizing gas costs.

PREVIOUS EXPERIENCE

Founder Premium Auto Details LLC

 LAX, Los Angeles, USA | 2014 – Present

- Built a luxury auto detailing business serving elite clients at LAX.
- Managed operations, client relations, and high-end service delivery.

IT-TC

Network Support Specialist

 IT-TC | Los Angeles, USA | 2007 – 2016

- Provided network security, IT support, and system administration.
- Handled firewalls, VPNs, troubleshooting, and system upgrades.
